

## UC RIVERSIDE - Student Comments of Instructor, Discussion Courses - Fall 2020

Course: MATH 007A Section: 023 - CALCULUS FOR LIFE  
SCIENCES

Instructor: Chris Grossack

**Question # 18:** YOUR CONSTRUCTIVE COMMENTS ON YOUR GRADUATE STUDENT INSTRUCTOR'S TEACHING SKILLS ARE EXTREMELY IMPORTANT. PLEASE WRITE YOUR COMMENTS IN THE TEXTBOX BELOW. PLEASE LIMIT YOUR COMMENTS TO 2000 CHARACTERS.

- They were a really good at teaching us and being really kind and respectful. I think that the material was a lot easier to understand when they taught it and they did a really good job in general!
- They helped me understand the content so much. Amazing at explaining information and created a warm and welcoming environment. Extremely considered of our situations and helped all of us with extra review sessions and office hours.
- Chris was amazing, they were better at teacher than the actual professor.
- I really enjoyed the way Chris held their discussion sections. I felt supported and encouraged to continue putting in my best effort. They created a space where I did not feel intimidated to ask questions and get clarification for concepts that I did not understand.
- Loved Chris, absolutely incredible. Chris went above and beyond to answer each and every one of my questions both in class and in email. I am so thankful for the discussion section because that is the primary reason I understood the material. Thank you Chris!!!
- Chris is an excellent teacher that did an outstanding job in clarifying any questions about the material and/or lectures. I personally looked forward to our discussion sections, as Chris never failed to show enthusiasm toward calculus and teaching his students something new, which always put a smile on my face. It is clear that Chris has a passion for the subject matter and it's quite refreshing; I definitely learned a lot of valuable information that I could put towards my major. Give Chris a raise!
- Chris was a great instructor and made themselves very approachable. My only complaint, which isn't much to his control, was that their handwriting was a little difficult to read.
- They was very helpful and did a good job teaching!
- I love Chris, thank you Chris! Even though I REALLY hate calculus, I enjoyed their discussion section, and their personality made it enjoyable :)
- Chris was very helpful during discussion classes. They would go through any questions the students had and if there were no questions they would make example problems. They would also often go more in depth about the math problems or provide easier/alternative ways to solve the math problems.
- This discussion section was so helpful. Chris did a great job at addressing our questions and helping us solve them step by step.
- Overall the instructor thoroughly explains concepts and answers our questions very well. Additionally, they provide useful feedback on our worksheets.
- This instructor has great teaching skills. There is no problem I see.
