

UC RIVERSIDE - Student Comments of Instructor,
Discussion Courses - Spring 2024

Course: MATH 010B Section: 022 - CALCULUS:SEVERAL
VARIABLES

Instructor: Chris Grossack

Question # 18: YOUR CONSTRUCTIVE COMMENTS ON YOUR GRADUATE STUDENT INSTRUCTOR'S TEACHING SKILLS ARE EXTREMELY IMPORTANT. PLEASE WRITE YOUR COMMENTS IN THE TEXTBOX BELOW. PLEASE LIMIT YOUR COMMENTS TO 2000 CHARACTERS.

- A great person who was approachable and you could ask questions to. Also, they always assured us that we would do fine even after the midterm/quizzes kept on getting pushed back.
- I feel like they rush a little when they're going over problems in discussion, but that might be due to the small amount of the we have during discussion
- Very effective in explaining key concepts of math to the class. Came to class prepared and answered any questions asked. Made the material easier to understand.
- This TA was very helpful in my success in this Math Course. They helped with clarifying the material in a level that an undergraduate student would be able to understand. They were also very enthusiastic about their topic and they also interact with students on other matters during discussions which I believed helped maintain a positive learning environment. Overall, this TA was an effective instructor overall and was very helpful for many students especially in a class as challenging as Math010B.
- Chris works very effectively in their discussion session, and they help me a lot in understanding the teaching material.
- Very helpful in teaching concepts with clear diagrams and direction. They could become a professor and do very well.
- Lots of respect for them honestly. They got me through the semester because God knows the professor had no clue what was happening. Keep it up, you were great.
- They were good at explaining any questions that were given to them and helped greatly at further clarifying the concepts that were introduced to us during lecture.
