- Very passionate about mathematics, explains concepts perfectly, and is willing to help students
- Chris was an incredibly sociable and effective instructor. Often, he was able to make up many students' questioning apprehensions of the main lecture. He made many topics of the class digestible and much easier to learn. Chris has an enthusiastic demeanor which is much appreciated by students and was of great help to me and my learning.
- They were great, there were some topics which they explained better than others with relevancy with the course material, and always went over what was needed. Overall, they were great and helpful.
- Thank you so much! I think I learned a lot more and understood the material a whole lot clearer than the actual lectures. Your teaching style was amazing and I had a great experience.
- Chris is honestly such a good TA. They help you understand the concept's and provides alternative if you don't understand it. One thing I would recommend is to spend more time explaining what you want for the worksheet since it feels ambiguous on what we can write.
- Great TA, always helpful to students. Explains topics very well!
- Chris was an amazing TA. There were a lot of concepts that were introduced in class that I did not get. Through Chris's discussion period I gained a better understanding of the content. I really liked that Chris provided a lot of examples each differing in difficulty level that really prepared us for exams. It was really easy to ask questions in discussion if we didn't understand.
- The TA was good at explaining difficult concepts and creating examples that help individuals better understand the overall topic. Chris was always ready to answer any questions about homework or quizzes and always explained them in detail to ensure that we understood the topics. Really enjoyed going to the discussion.
- Discussions were always engaging and made it much easier to grasp the concepts covered in the class
- No particular comments to add. An overall excellent instructor who significantly helped students understand lecture material and prepare for exams.
