

UC RIVERSIDE - Student Comments of Instructor,
Discussion Courses - Fall 2021

Course: MATH 131 Section: 002 - LINEAR ALGEBRA I
Instructor: Chris Grossack

Question # 18: YOUR CONSTRUCTIVE COMMENTS ON YOUR GRADUATE STUDENT INSTRUCTOR'S TEACHING SKILLS ARE EXTREMELY IMPORTANT. PLEASE WRITE YOUR COMMENTS IN THE TEXTBOX BELOW. PLEASE LIMIT YOUR COMMENTS TO 2000 CHARACTERS.

- Chris was an amazing TA with excellent teaching skills. They made sure that everyone was understanding the material before moving on, and they took the time to explain whatever it was that we didn't understand. They are very approachable and that is what me feel comfortable enough to converse with them and ask questions.
- Chris was an amazing TA. Given that the material seemed very abstract, they would always come with the best analogies of the content. Lessons that were very unclear became easier to understand when they were explained. They were willing to do a ton of office hours throughout the week and I think they went even above what they had to do as a TA. I felt like my education was important to the TA and I was always comfortable asking for help.
- There is not much improvement Chris can do, Chris understood the subject and effectively showed us his understanding and helped us with our problems.
