

UC RIVERSIDE - Student Comments of Instructor, Discussion Courses - Winter 2025

Course: MATH 006B Section: 002 - PRECALC: INTRO TO
FUNC 2

Instructor: Chris Grossack

Question # 18: YOUR CONSTRUCTIVE COMMENTS ON YOUR GRADUATE STUDENT INSTRUCTOR'S TEACHING SKILLS ARE EXTREMELY IMPORTANT. PLEASE WRITE YOUR COMMENTS IN THE TEXTBOX BELOW. PLEASE LIMIT YOUR COMMENTS TO 2000 CHARACTERS.

- They were an amazing TA. They helped me understand all the concepts much better. They always checked on us in groups for questions. They were willing to explain problems in many ways to help us understand. I wish I could have them again.
- Chris was a super chill TA and always explained things super easily. They were super helpful when completing the assignment during discussion. They always asked if any of us needed help or had any questions. There was never any moment of an uncomfortable situation or where I felt pressured or stressed at all. Responses to emails or messages were fast. They were so nice and cheerful, which you don't see very often earlier in the morning. I wish all my TAs were like Chris.
- Good TA, responsible
- Super nice instructor to have and definitely makes the class fun. Always there when you need help but sometimes their answers are a little long and don't make sense.
- Was very approachable from the first day. Made the environment very friendly and addressed all matters, absences, pronouns, etc. She made us all feel very comfortable with each other as she encouraged us to talk to each other from the first day. When it came to math she was very helpful when solving questions as she would first explain helpful knowledge to understand what the question wants and why its that. Always had a smile and was very sweet and thorough!
- The graduate instructor's office hours were very flexible, the help for the worksheets and homework were very useful and encouraged me in continuing in the class. Showed very kind characteristics in teaching the material when one was confused on questions. And was also understandable when it came to having issues in missing class or when one has trouble in understanding the math topics. Overall, I enjoyed my experience and the class in general.
- Chris is an amazing ta. She was very helpful with explaining topics that the class and myself struggled on. She was approachable and very well prepared/knowledgeable to the subject that she taught. Overall Chris is an excellent TA and I was lucky to have her teach me in a subject that I enjoy.
- Chris did a great job as a TA in helping out with the worksheets and even homework assignments by explaining them in real world situations and how to solve the problems. By these real world examples and walk throughs on how to solve certain problems and even using visuals on the board to do so really helped me understand the relevancy of the topics in MATH6B and overall made the learning experience better. Chris was always there to answer any questions regarding our worksheet for the week as well as the homework assignments we had; this mixed with being easily approachable really encouraged me to ask questions of my own if I ever got stuck and to not be shy.
