

UC RIVERSIDE - Student Comments of Instructor,  
Discussion Courses - Fall 2023

Course: MATH 031 Section: 012 - APPLIED LINEAR ALGEBRA  
Instructor: Chris Grossack

**Question # 18:** YOUR CONSTRUCTIVE COMMENTS ON YOUR GRADUATE STUDENT INSTRUCTOR'S TEACHING SKILLS ARE EXTREMELY IMPORTANT. PLEASE WRITE YOUR COMMENTS IN THE TEXTBOX BELOW. PLEASE LIMIT YOUR COMMENTS TO 2000 CHARACTERS.

- Chris is really good at explaining the material and very patient!
- They were really great at explaining the course materials.
- Chris doesn't teach or go over material properly. She took forever to grade our midterms, when all the other sections had them graded a week before. I started going to the other TA's discussions because of how unhelpful Chris was.
- They understand the material really well and is very approachable for when you're lost on the material but want to ask a question. Discussion section was really informative and you can tell they are super passionate about the topics and helping students!
- Chris was a great TA. Chris made the most out of every discussion session, answering all of the questions the students had and going through challenging questions. They were very accessible during office hours. They ensured that all of our concepts were clear. I do not have any suggestions or recommendations for improvement, as Chris was a great TA.
