

UC RIVERSIDE - Student Comments of Instructor,
Discussion Courses - Fall 2020

Course: MATH 007A Section: 024 - CALCULUS FOR LIFE
SCIENCES

Instructor: Chris Grossack

Question # 18: YOUR CONSTRUCTIVE COMMENTS ON YOUR GRADUATE STUDENT INSTRUCTOR'S TEACHING SKILLS ARE EXTREMELY IMPORTANT. PLEASE WRITE YOUR COMMENTS IN THE TEXTBOX BELOW. PLEASE LIMIT YOUR COMMENTS TO 2000 CHARACTERS.

- i loved his funny humor and wanting to help us understand math. he did a great job helping elaborate on complicated material and made online school enjoyable
- Office hours were always helpful and very friendly. Very approachable to ask questions and an understandable teaching style.
- A truly amazing and passionate instructor who really did an amazing deal of effort to explain concepts to us while keeping the content fun and easy to understand. It was an amazing experience being their student.
- Awesome TA. I swear he was so helpful with calculus. Class was so early in the morning and he'd be so enthusiastic and ready to teach and support. If there was any question, he would answer to the best of his abilities. I don't know how else to describe how amazing Chris is. I appreciate his efforts so much.
- The discussions didn't really help me learn the material outside of lectures nor was it very engaging. I don't mind the cursing, but there should be a professional environment.
- Chris was an amazing TA who helped me do well on Math 7A. Chris would always help me with the worksheets constantly and would always help me solve questions that I never really understood. Chris also took extra time to schedule more office hours in case he was unable to answer questions people had the day before. Chris never stressed us out and was always very relaxing. Chris never overtaxed us with work and made it simple to understand. The only thing that I could complain about was when I looked under the notes again to review for the test, the notes were a little messy because of the writing but besides that everything else was great.
- The student instructor was very helpful as they went over topics discussed in lectures and showed examples to explain more in detail. Office hours were great as they helped me understand homework problems and guided me on how to approach the problems. Furthermore, the student instructor motivated students to do their best and was very open, allowing students to feel comfortable around them.
- They were a very kind instructor who was very knowledgeable about the subject. They provided other ways to solve math problems that were not taught during lectures nor introduced in the book. They were also always making sure to answer questions that students had. On the other hand, it was difficult to read their writing due to the class being taught online.
